# ARIA SM

- 1 Resilient, easy-to-clean aluminum laminated panels help reduce contaminations
- 2 Study, anodized aluminum framework is virtually maintenance-free
- 3 Interspec universal horizontal equipment management rails and tracks accommodate all types of accessories
- 4 Medical gas outlet stations can be placed as needed
- 5 Nurse call station and code blue terminals from other suppliers are easily installed and can be placed wherever they are required
- 6 Computer communications and monitoring receptacles can be utilized and an Interspec Systems Tilt-Swivel Monitor Bracket and slide support can also be specified
- 7 Additional, easy-to-reach power outlets can be placed wherever needed
- 8 Durable, removable Corian® end caps can be ordered in a range of decorative colours

Two-Tier Surface Mount

ARIA Headwalls can also be configured to meet other international standards and codes, ask us for more details.

COMPACT SURFACE-MOUNTED HEADWALL SYSTEMS DESIGNED FOR MAXIMUM PERFORMANCE

**ARIA SM Surface Mounted headwalls are stylish, convenient and designed to perform under the most demanding hospital conditions. Whether you need a simple, compact single-tier system or more versatile two-tier units, Aria SM headwalls are adaptable, self-contained and can be installed with a minimum of damage and modifications to existing walls.**

#### HEADWALL COMPONENTS

- **Medical gas outlets** are factory-installed by Interspec and checked for compliance to the specifications. All outlets and manifolds are tested in accordance with CSA Z7396.1-06 and/or NFPA 99. Singular terminal connections as specified in the drawings are provided for the primary supply line hook-ups by the mechanical contractor.
- **Power outlet receptacles** are all Hospital Grade and CSA/UL listed. The quantity and type are as specified in the final plans at the end of our design consultation.
- **Internal Ground Bus** is included with a minimum of 8 screw fasteners. The ground bus assembly also provides a positive means for grounding the breaker enclosure.
- **Grounding Jacks** are externally accessible and are provided as required. The springloaded, solid brass receptacles are enclosed in a non-conductive housing, and are manufactured to CSA and/or NFPA 99 specifications.

• **All Interspec Headwalls** demonstrate the superior quality and functionality that comes from our many years of experience and design expertise. Interspec also provides the ultimate in customer assistance and service after the sale, and our products are backed by the best warranty in the business. Contact us for more information.

**INTERSPEC ARIA SM Series** surface-mounted horizontal headwall systems are custom-manufactured to fulfill the customer's specifications and objectives as laid out in the detailed shop drawings and documents prepared during our consultations in the preliminary design stage.

#### BASIC CONSTRUCTION

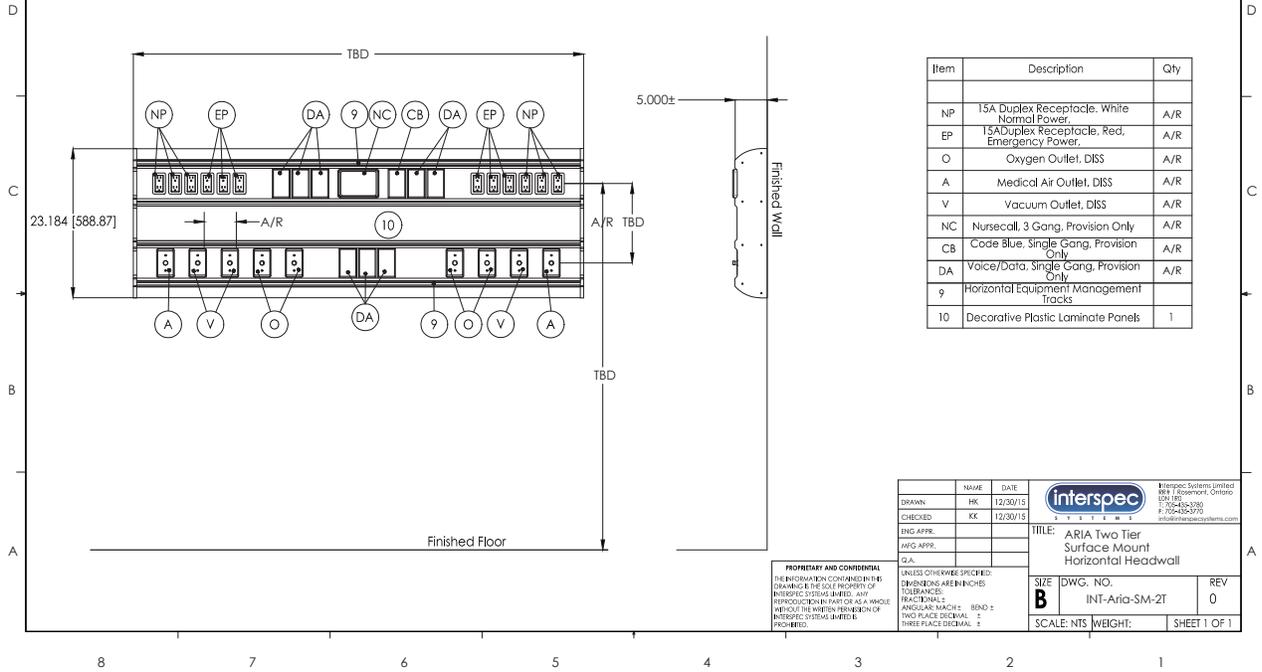

The enclosure is constructed of extruded, satin clear anodized aluminum sections providing a modular, self-contained wall unit. Horizontal conduits are factory-assembled and wired to include the specified mechanical and electrical components. The anodized aluminum

fascia is removable allowing access to the internal components.

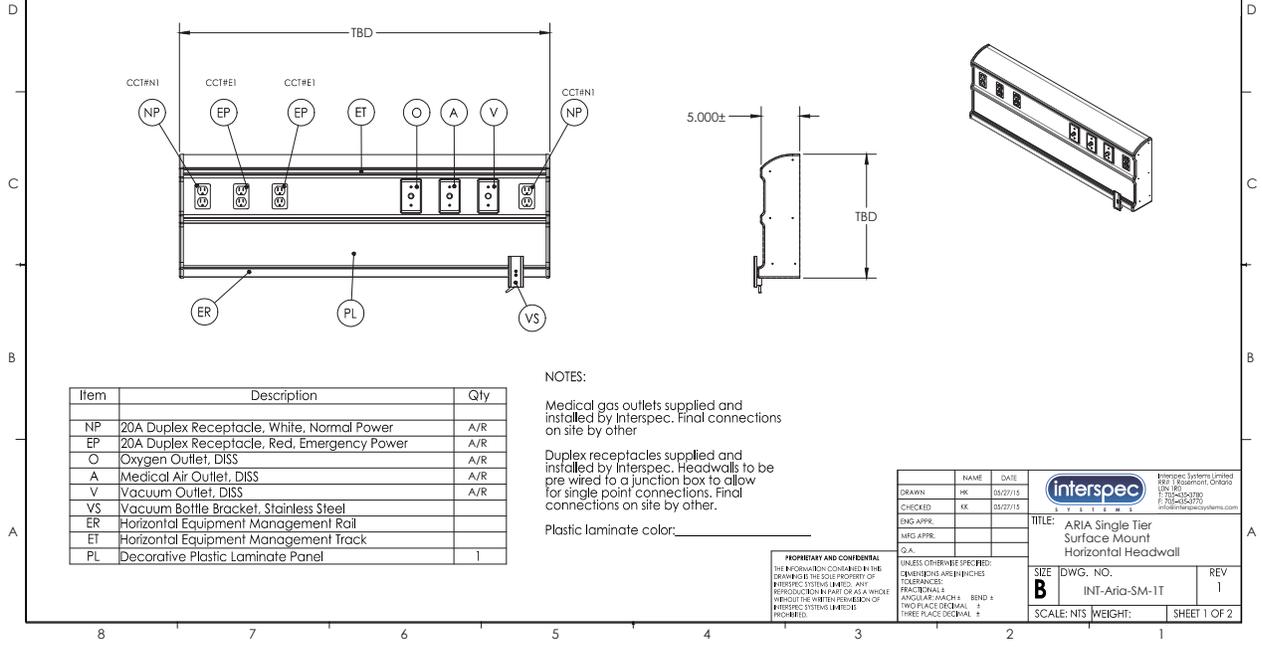

Integral electrical backboxes made from durable galvanized steel come with double knockouts for easy installation of the primary electrical conduit runs by the electrical contractor. All secondary internal wiring is enclosed in built-in conduits terminating at a convenient electrical connection point. All wiring is marked, colour-coded and tie wrapped for easy circuit identification and hook-up.

The laminated aluminum cover panels come in a wide selection of patterns and colours from several manufacturers.
