UNITY SM

- 1 Resilient, easy-to-clean decorative laminate panels help reduce contaminations
- 2 Sturdy, anodized aluminum framework is virtually maintenance-free
- 3 Interspec universal vertical equipment management rails and tracks accommodate all types of accessories
- 4 Medical gas outlet stations can be placed as needed
- 5 Nurse call station and code blue terminals from other suppliers are easily installed and can be placed wherever they are required
- 6 Computer communications and monitoring receptacles can be utilized and an Interspec Systems Tilt-Swivel Monitor Bracket and slide support can also be specified
- 7 Additional, easy-to-reach power outlets can be placed wherever needed
- 8 An extensive line of convenient Interspec accessories is available to cater to almost any need and can be easily placed with our versatile mounting attachments

UNITY
Vertical Headwalls can also be configured to meet other international standards and codes, ask us for more details.

INTERSPEC UNITY SM Series surface-mounted vertical headwall systems are custom-manufactured to fulfill the customer's specifications and objectives as laid out in the detailed shop drawings and documents prepared during our consultations in the preliminary design stage.

BASIC CONSTRUCTION

The enclosure is constructed of extruded, clear anodized aluminum sections providing a modular, self-contained wall unit. Internal raceways are factory-assembled and pre-wired to include the specified mechanical and electrical components. The anodized aluminum fascia panels are removable allowing access to the internal components.

Bevel-Sided Surface Mount

Integral electrical backboxes made from sturdy galvanized steel come with double knockouts for easy installation of the various primary electrical conduits. All secondary internal wiring is enclosed in conduits terminating at a convenient electrical connection point. All wiring is marked, colour-coded and tie wrapped for easy circuit identification and hook-up.

The plastic laminate cover panels are available in a wide selection of patterns and colours from several manufacturers.

ADVANCED SURFACE MOUNTED VERTICAL HEADWALLS ALLOW EASY ACCESS

UNITY vertical headwalls offer an effective alternative to horizontal headwalls, allowing more than one bed location to be serviced by a single unit while providing hospital staff safe, convenient access to equipment without reaching over the patient. UNITY surface mounted vertical headwalls are extremely adaptable and can be installed with a minimum of damage and modifications to existing walls.

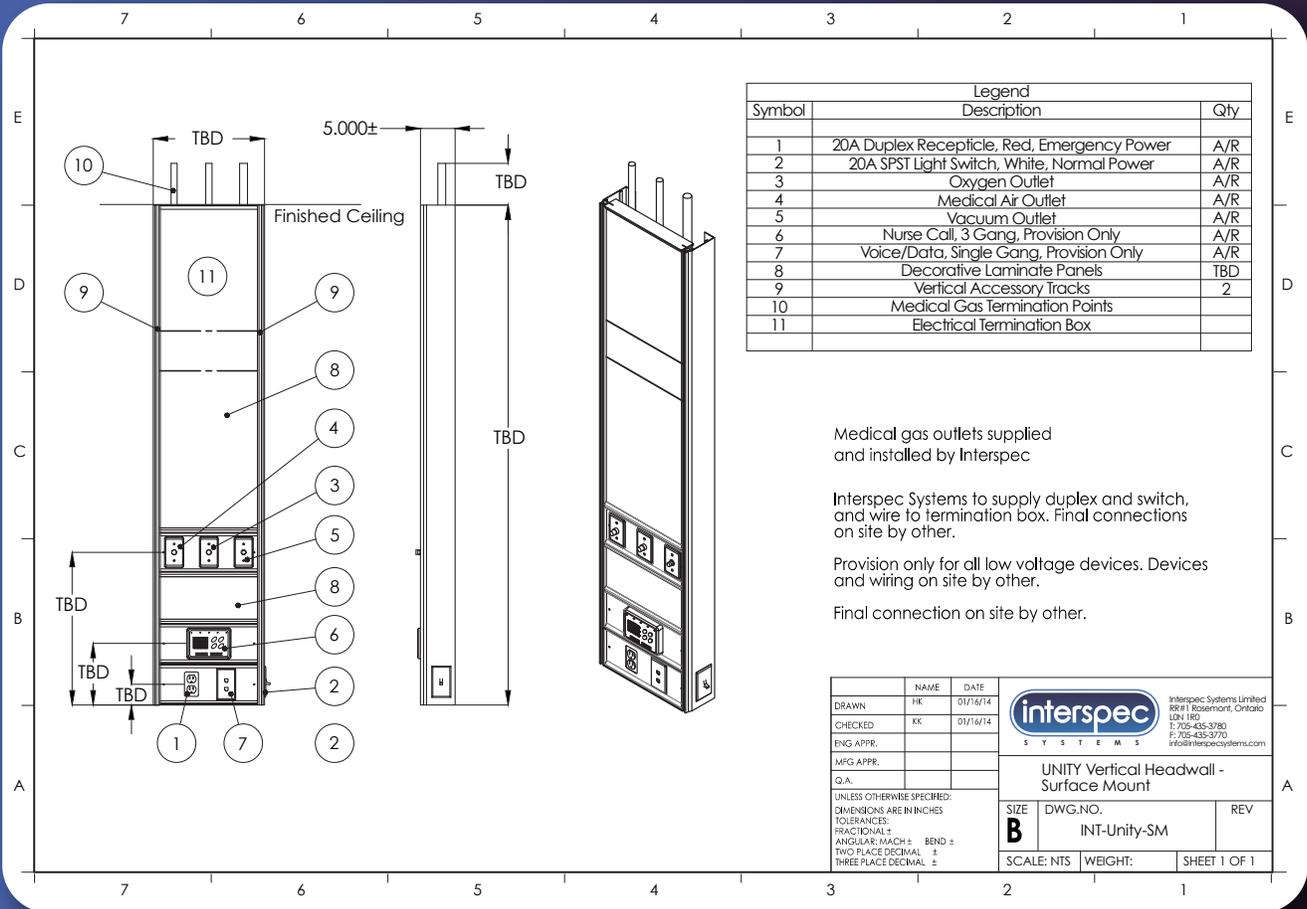

HEADWALL COMPONENTS

- **Medical gas outlets** are factory-installed by Interspec and checked for compliance to the specifications. All outlets and manifolds are tested in accordance with CSA Z7396.1-06 and/or NFPA 99. Singular terminal connections as specified in the drawings are provided for the primary supply line hook-ups by the mechanical contractor.
- **Power outlet receptacles** are all Hospital Grade and CSA/UL listed. The quantity and type are as specified in the final plans at the end of our design consultation.
